NONCREDIT SPRING SCHEDULE

JANUARY-MAY 2020 | MORaineVALLEY.EDU/CCCE

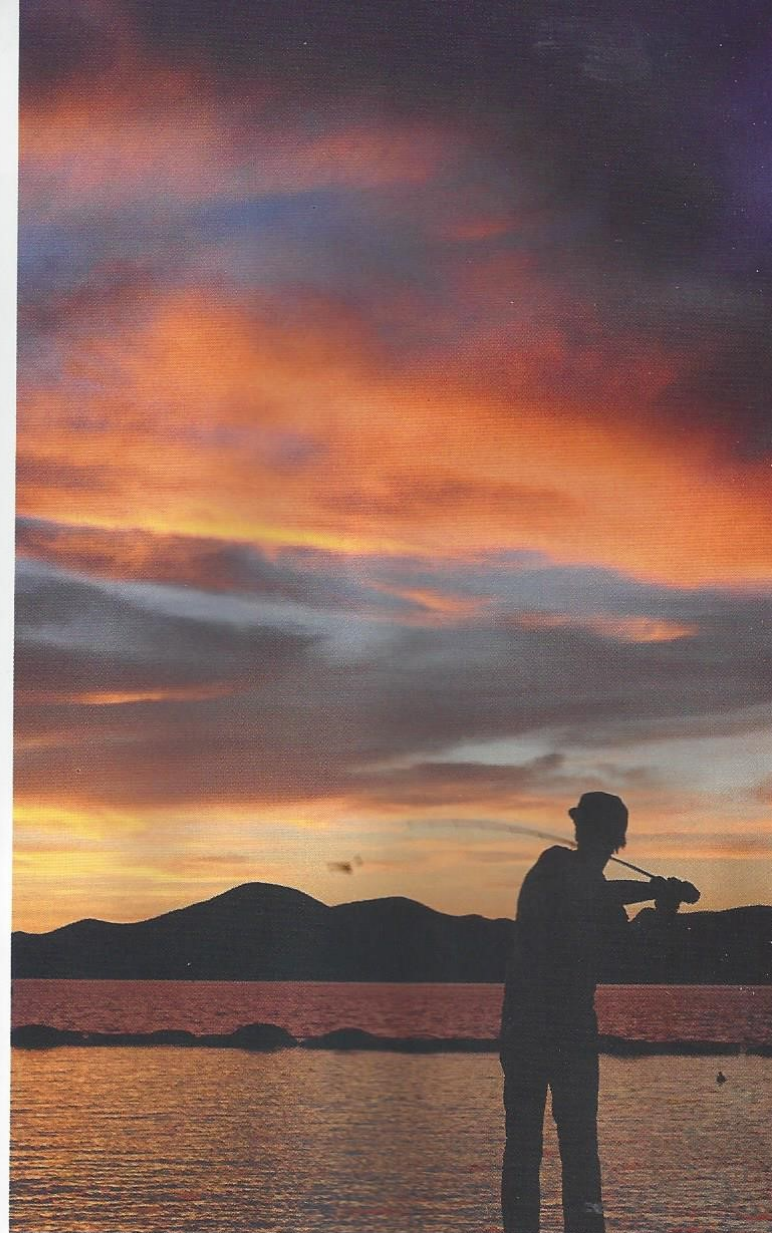

Classes take your vacation to the next level

If spring is your ideal time to travel, consider taking a few of our noncredit courses to get you prepared for the perfect vacation. **Travel 2020**, taught by Janet Polson, travel manager at Moraine Valley, is the perfect place to begin. You'll learn about this year's hottest destinations, where to stay, what to do and changes in travel policies. "I always start my class by asking everybody what they have in mind. Then, I try to guide the information in my class to specifically what they're looking for," she says.

Polson also uses her expertise as former owner of a travel agency to showcase how you can secure the best deals in her course **Travel: Let's Find a Deal**. "In each of the classes I teach, I talk about the best ways to find cheap flights," says Polson. "Of course, I can't create cheap flights where there aren't any, but I can give people the tools needed to find them."

If you're looking to travel overseas, consider one of our conversational language classes. These courses will prepare you with the basics, so you can feel confident engaging with local residents. Languages include **French, Italian, Polish** and **Spanish**.

During your travels, you'll want to capture your favorite memories. Our **Smartphone Photography** class is perfect for beginners looking to take great photos on their smartphone

camera. Those with a new digital camera or looking to refresh their skills might be interested in taking **Photography, Beginning**. Learn how to create photos that go beyond the typical travel pictures with **Making Great Vacation Photos**. Whether you have a camera or smartphone, this course will make you the envy of your friends!

Although it's fun to share photos on social media, it's not always the best way to save your memories. Susan O'Keefe teaches courses to help you ensure your photographs are properly preserved, such as **Introduction to Saving Your Photos** and **Saving Photos in the Cloud**, "The cloud is quite safe, and we'll cover the different types of cloud storage options in the course," she says.

O'Keefe's favorite way to showcase her travels and keepsakes is in photo books, noting she sees such joy in her grandchildren's faces when they look through them. Get her best tips in **Creating and Printing a Photo Book**. Capturing, saving and sharing photos is important to O'Keefe for many reasons. "It's not just the photo – it's the story that goes along with it," she says. 

Our travel courses will teach how to find the best travel deals, prepare for your trip and organize your travel keepsakes. Janet Polson, left, and Susan O'Keefe.
